**Project Detail**

**Background**

BSG Property Services Ltd is a first class property maintenance service and refurbishment company with 30 years experience of working in the Social Housing sector. The BSG Property Services group, which has head quarters near Sandy, Bedfordshire and includes Lee Roofing Ltd and Lysander Scaffolding Ltd, offers a full range of building and maintenance services as a single solution to public and private sector clients and has approximately 250 employees across group companies.

**The Drive for Change**

BSG's initial driver for the project was the requirement to manage the diverse training and development needs of 250 dedicated craftsmen, engineers and operatives. However upon searching the market for a suitable solution the project team reached the conclusion that a standalone learning and development solution was not going to meet their detailed requirements and saw the benefits that a comprehensive HR software system could afford the business.

**Choosing Carval**

BSG chose Carval's Unistaff HR Software as it included a fully-integrated learning and development module as part of the core solution making it not only cost-effective but enabling joined-up processes across the employee life-cycle.
